

SITE CARDS

The following cards feature twelve sites with unique characteristics that create various design challenges. They can be used and adapted for any design or building lesson to challenge participants with real-world design scenarios. For an additional challenge, the site cards can also be paired with client cards which provide specific needs and requests. To find lessons that pair with these sites explore build and design in the Lesson Plan section of the Teaching by Design website. And don't forget to check out how Frank Lloyd Wright solved some of the same design challenges!
